**TABLE 1** | Gold Production<sup>[1]</sup>

Total Consolidated	2019 Actual <sup>(2)</sup>	2020 Actual	2021 Guidance Range <sup>[4]</sup>
Gold Production	980,219 ounces	1,040,737 ounces	970,000 to 1,030,000 ounces
Cash Operating Costs (\$ per ounce produced)[3]	\$512 per ounce	\$423 per ounce	\$500 to \$540 per ounce
All-In Sustaining Costs (\$ per ounce sold) <sup>[3]</sup>	\$862 per ounce	\$788 per ounce	\$870 to \$910 per ounce

### NOTES

<sup>11</sup> Actual and projected production results are presented on a 100% basis for the Fekola and Otjikoto Mines and Masbate Gold Project and include attributable ounces from Calibre production (the Company's approximate 33% share).

<sup>123</sup> 2019 includes El Limon and La Libertad discontinued operations results and equity investment in Calibre.

<sup>131</sup> See "Non-IFRS Measures" in Cautionary Statement on page ii of the main report.

Based on current assumptions.

TOTAL	1,788,928	288,471	350,779	144,576	134,035	419,089	14,387	437,591

<sup>[1]</sup> Adjusted Cash Operating Costs are "Cash Operating Costs" (see "Non-IFRS Measures" in the Cautionary Statement on page ii of the main report) less Employee Wages and Benefits of \$112 million and Payments to Government of \$3 million directly related to operations. Adjusted Cash Operating Costs are presented in the table above instead of Cash Operating Costs to avoid double-counting Employee Wages and Benefits and Payments to Government (which are separately presented in columns D and F, respectively) in the above table. <sup>[23]</sup> Capital Expenditures consist of sustaining and non-sustaining capital expenditures, including exploration and development projects.

Payments to Providers of Capital consist of corporate dividends paid to B2Gold shareholders, the 10% ordinary dividend paid to the State of Mali, interest and commitment fees with respect to the Company's RCF, and equipment loans at the Company's mines and leases. Head Office payments to Providers of Capital totalling \$124.5 million includes \$116 million of dividends paid to B2Gold shareholders, and RCF interest and commitment fees of approximately \$8.5 million.

[4] Payments to Governments consist of income and withholding taxes, production taxes, property taxes and business licences, and the 10% priority dividend to the State of Mali, which are reported on an accrual basis (and exclude government payroll taxes, VAT and import duty payments). Annually, B2Gold also publicly reports, on a cash basis, its specific payments to governments (including income taxes and production taxes), as per the Canadian Extractive Sector Transparency Measures Act (ESTMA).

TABLE 3 | 2020 Supply Chain and Local Procurement

	Mine	<b>Definition of</b> "Local – Community Level"	<b>Definition of</b> "Local – National Level"	Local – Community Level (% of total purchasing)	Local - National Level (% of total purchasing)

# ENVIRONMENT DATA TABLES

### NOTES

nr = not reported

C13 Some sites discharge some domestic wastewater to municipal sewage systems or through septic up-flow anaerobic filter or similar treatment systems in line with relevant regulatory requirements; some of these discharges are measured and reported here while other discharges are not measured.

<sup>123</sup> Consolidated figures for untreated discharge to groundwater are not available due to the continued configuration of the sitewide water balance at the Masbate operation. Consolidated data will be provided in the 2021 Report.

TABLE 6 | 2020 Consolidated Water Consumption and Discharge by Category<sup>[1]</sup>

Site	Total Water Withdrawn			Total Water Discharged				
	Category 1	Category 2	Category 3	Total	Category 1	Category 2	Category 3	Total
Fekola	2,485	3,543	0	6,028	0	87	0	87
Otjikoto	3,372	0	0	3,372	0	100	0	0

Total	16,516	5,603	0	22,119	0	238	4,173	4,412

<sup>[1]</sup> Water quality categories are based on the Minerals Council of Australia definitions:

Category 1: Water is of a high quality and may require minimal and inexpensive treatment to raise the quality to appropriate drinking water standards.

Category 2: Water is of a medium quality with individual constituents encompassing a wide range of values. It would require moderate levels of treatment such as disinfection, neutralization, and the removal of solids and chemicals to meet appropriate drinking water standards.

Category 3: Water is of a low quality with individual constituents encompassing high values of total dissolved solids, elevated levels of dissolved metals or extreme levels of pH. It would require significant treatment to remove dissolved solids and metals, neutralize, and disinfect to meet appropriate drinking water standards.

<sup>2016</sup> data excludes Masbate Gold Project recycled scrap metal tonnage.

# **TABLE 17** | 2020 Level 3+ Incidents with Environmental Impacts

Site	Incident Description	Remedial Measure Taken

# Level 5 Incidents

None

# Level 4 Incidents

Otjikoto A high potential incident (HPI) occurred when the TSF return water pond overflowed during a high intensity rainfall event. This resulted in the release of an estimated 100,000 m<sup>3</sup> of low-level contaminated, cyanide-containing water to the environment. The actual impact of this incident was considered low and did not result in a fine or sanction for the Company.

Site water management procedures, including management of freeboard during the wet season, were updated.

### Level 3 Incidents

Fekola Authorized discharge of mobile toilet waste to the environment near the community of Tintiba resulted in community grievance.

All waste is now treated at a sewage treatment plant at the Fekola site.

Fekola A failed coupling on a leach tank within the process plant resulted in the loss of 1,000 m<sup>3</sup> of low-level contaminated, cyanide-containing material outside of the designated containment area.

The material was collected and returned to the process circuit and the height of containment walls increased.

Masbate An exploration drill sump leaked through loose ground causing discoloration of a nearby community well.

Drinking water was supplied to the community until the water quality was confirmed to have returned to original levels.

# OUR PEOPLE DATA TABLES

# **TABLE 18** | Diversity Representation

# Employee » Committees

- In Mali, staff representative bodies consist of 18 nationals from the supervisory and specialized professional categories. Technical and administrative categories are well represented. Two females were elected in 2020.
- » In Namibia, both the union's Branch Executive Committee (BEC) and the Affirmative Action Committee members are elected by employees. Both committees represent the applicable employment categories, all types of positions and age groups, and have female members. The Affirmative Action Committee has 11 members: four are female and eight are previously-disadvantaged. The BEC has 13 members: three are female and 11 are previously-disadvantaged.
- » In the Philippines, skilled to professional level employees engage with the Masbate Gold Project via the Employee Engagement Committee. Diverse age groups are well represented and approximately 35% of the membership is female.
- » The various committees that represent staff have an overall female membership of 23%; 12% of all members are below 30 years of age, 83% between 30 and 50 years, and 5% are above 50 years of age.

# Management » Governance Bodies

- In Mali, the 53-member management representative body is mostly in the 30 to 50 age group and currently has 23 nationals and six female members.
- » In Namibia, the 23-member management team has four females and 19 members are Namibian. The management team consists of 10 members from previouslydisadvantaged groups and age groups are well represented.
- » The management team in the Philippines represents all age groups, of which 100% is local, with 33% female representation.
- » The 16-member corporate management committee has one female; the group is divided between the 30 to 50 and above 50 age groups.
- » Management teams across the Company have a 22% female representation; 74% of these team members fall in the 30 to 50 age group, with the balance being over 50 years of age.

# Corporate Team and Board of Directors

- » The nine-member B2Gold Board has two female directors, seven independent members, and an average age of 64.
- » The five-member Board of Directors in the Philippines has one female director.
- » The seven-member Namibian Board of Directors has no female members; two of the seven are previously-disadvantaged persons.

# TABLE 19 | List of Unions and Employee Representative Committees

### Fekola Mine

- Union established in 2019 and represents 100% of employees
- In process of formalizing a Collective Bargaining Agreement (CBA)

# Otjikoto Mine

- Union in place that represents 58% of employees
- CBA in place

# Masbate Gold Project

• Employee engagement committee in place

rea Restricted Work Injury (RWI).

<sup>•</sup> Frequency and Severity Rates are based on 200,000 man-hours. New information or a re-classification of injuries may cause a change in historical data.

<sup>•</sup> Severity Rate includes days lost due to injury and/or days worked on modified or restricted duties.

<sup>113 &</sup>quot;Other" refers to global Exploration, Development Projects and Vancouver-based Technical/Engineering Services. Statistics began in 2019.
